

“My husband has always been keen [on automation] but I was worried about spoiling the character of the house with all these gadgets, but they managed to hide them all away while being always available”  
-- Wife of a satisfied customer

“Just press the key fob and the house locks itself – I mean not just armed, but gates get locked, lights go off, heating is reset, CCTV surveillance is switched on and the phone gets redirected – truly amazing” -- Customer

### About Lifestyle Automation

Lifestyle automation analyses the use you make of a space and provides unobtrusive, reliable automation to perform repetitive or time-consuming tasks. From creating the right environment at the touch of a button, to reconfiguring incoming phone lines or securing your property. Whether it is your normal residence, your weekend retreat or your summer house. And our systems can be controlled from local touchscreens, standard switches, web browsers with secure connections or simple touch phones. So no matter where you are, you are in control.
